

Curious Collection.®

## Products data

Arjowiggins works to continually reduce the environmental impact of paper manufacture.

- All Curious Collection Mills have a certified accredited Environmental management system (ISO 14001).
- Fully FSC certified

Curious Alchemy is an innovation in paper science. Each sheet of copper, silver, titanium, gold and platinum has a hammered effect resembling weathered metal.

## Fibre Sourcing

Virgin FSC fibres\*: 100 %

\* Virgin fibres are FSC certified credit mixed sources and ECF bleached, without using chlorine gas.

## Chemicals

- No substances classified as carcinogenic, mutagenic or reprotoxic (CMR) are used as raw materials.
- Chemicals that are sourced have low impact on the environment.
- Arjowiggins complies with the new REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) European regulation created to improve the protection of human health and the environment from the risks that can be posed by chemicals as well as the promotion of alternative methods of assessments, and enhancing competitiveness and innovation.

## Certified environmental management systems

The range is FSC certified, ECF, pH neutral.

ISO 9001 (Quality)	ER-0142/1993 Valid until 08-04-2021
ISO 14001 (Environment)	GA-1999/0219 Valid until 08-04-2021
FSC	TT-COC-002670 Valid until 11-04-2023

## Our transports

Arjowiggins transport policy is eco-responsible, optimising logistics and taking environmental issues into account: minimizing distances between raw material, mills and customers, shifting volumes to rail and sea transport wherever possible.

## Our packaging

All of our cardboard and polythene packaging material as well as the pallets are recyclable.

## Products data

Arjowiggins works to continually reduce the environmental impact of paper manufacture.

- All Curious Collection Mills have a certified accredited Environmental management system (ISO 14001).
- Fully FSC certified

Curious Matter is a perfectly homogenous and ultra-pigmented matt paper with an intriguing and indescribable touch. Its bold and grainy touch is possible due to its invisible texture composed of small particles of potato raw starch, a by-product of the food industry. This paper is ideal for surprising brochures, invitations, report covers, packaging etc.
